FLUORIDATION

Proven Prevention Protection

You may have seen people in front of local businesses soliciting voters to sign a petition to put a measure on the November ballot that would remove fluoride from the drinking water of the Marin Municipal Water District. **We are asking the public to please not sign this Initiative.** The information being distributed is misleading and false. Contrary to the claims of the Initiative representatives, the addition of fluoride to our water is well regulated, well researched, and has been shown in numerous studies to be safe and beneficial.

Here are some web sites where you can get the correct information:

<http://ilikemyteeth.org/fluoridation/>

<http://www.cdc.gov/fluoridation/factsheets/engineering/wfadditives.htm>

http://www.cdc.gov/fluoridation/safety/health_effects.htm

<http://www.cdc.gov/fluoridation/safety/index.htm>
